DETAILED ACTION

1. All outstanding objections and rejections are withdrawn in light of applicant's amendment filed on 7/14/2008.
2. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior office action.
3. The new grounds of rejection set forth below are necessitated by applicant's amendment filed on 7/14/2008. In particular, claims 85-113 are new. Thus, the following action is properly made final.

Claim Objections

4. Claim 104 is objected to under 37 CFR 1.75(c), as being of improper dependent form for failing to further limit the subject matter of a previous claim. Applicant is required to cancel the claim(s), or amend the claim(s) to place the claim(s) in proper dependent form, or rewrite the claim(s) in independent form. Specifically, 4-hydroxypropionate is not included in the Markush group of claim 103 (on which claim 104 is dependent). It is noted that 4-hydroxypropionate cannot exist because it only has 3 carbon atoms and cannot have a 4- substituent. In the interest of compact prosecution, in the prior art rejection below, 4-hydroxypropionate is read as 3-hydroxypropionate given that it is clear that 4- is a typographical error since claim 3 lists 3-hydroxypropionate.

Claim Rejections - 35 USC § 103

5. Claims 85-113 are rejected under 35 U.S.C. 103(a) as being unpatentable over Autran et al (US 6,838,037).

Autran et al discloses a composition used to make articles (col. 15, lines 27-34) comprising at least one first PHA copolymer comprising comonomer units of formula (I) which reads on 3- or 4-hydroxybutyrate or 3-hydroxypropionate *inter alia* and formula (II) or formula (III) which reads on 4-hydroxybutyrate *inter alia* (col. 6, line 36 to col. 7, line 12) and at least one second PHA copolymer that is a homopolymer or copolymer comprising units of formula (IV) which reads on 3- or 4-hydroxybutyrate *inter alia* and formula (II) or formula (III) which read on 4-hydroxybutyrate *inter alia* (col. 7, lines 13-52). The blends can be mixed with other polyhydroxyalkanoate (i.e., third PHA) or other polyesters in an amount of at least 50 wt % (col. 14, line 65 to col. 15, line 12).

Autran et al fails to exemplify a blend of three different PHAs.

Even so, given that Autran et al teaches that at least one first PHA or at least one second PHA can be used to prepare the blend and further given that the first and second PHAs can be mixed with other PHAs as well as with other polymeric materials, it would have been obvious to one of ordinary skill in the art to prepare a blend of three different PHAs for use to make an article as taught by Autran et al.

Response to Arguments

6. Applicant's arguments with respect to the claims have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

7. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
